## **DETERGENT 8**°

### **Low-Foaming Ion-Free Detergent**

- Replace solvent cleaning
- Concentrated to save you money
- Biodegradable and readily disposable
- Penetrating wetting power to save you time
- Free rinsing to provide reliable results and no interfering residues
- Contains no phosphate, sulfur, chlorine, metal cation, halide, borate, silicate, carbonate, chlorocarbon, fluorocarbon or chelating ingredients

**Used to clean:** Circuit boards, electronic parts, phosphate sensitive labware, nuclear reactor cavities, delicate industrial parts and nuclear contaminated equipment during outage. FDA certified.

**Used to remove:** Resins, rosins, oils, dirt, grime, particulates, residues, fluxes, chemicals and solvents.

**Surfaces cleaned:** Corrosion inhibited formulation recommended for glass, metal, stainless steel, ceramic, plastic, and circuit boards. Can be used, with prompt rinsing, on soft metals such as copper, aluminum, silver, and gold. Aluminum can darken and mixed metal galvanic reactions can occur. Corrosion testing is advisable.

**Cleaning method:** Soak, brush, sponge, cloth, ultrasonic, ware washer, spray washer, pressure washer and flow through clean-in-place.

**Directions:** For manual, soak and ultrasonic use, make a 3–5% solution (4–6 oz per gal, or 30–50 ml per L) in warm or hot water. An oily, milky solution is normal. Protective gloves and eyewear are recommended. For spray machines, add detergent at the hot water wash cycle to make a 2% solution (2 1/2 oz per gal, or 20 ml per liter). For difficult soils, raise water temperature and use more detergent.

RINSE THOROUGHLY—preferably with running water. For critical cleaning, do final or all rinsing in distilled, deionized or purified water. Used on a range of glass, ceramic, plastic and metal surfaces. Corrosion testing is advisable. Material compatibility guidelines available on request.

### **Chemical Description**

DETERGENT 8 is a nonionic, phosphate-free homogeneous blend of an alkanolamine, glycol ethers and an alkoxylated fatty alcohol. Contains no chelating agents, halides or conductive metal cations such as sodium.

#### **Cleaning Validation Methods**

Test a parameter of rinse water before and after rinsing the cleaned surface, or test the clean surface. No significant change in the parameter indicates no detectable residue. Parameters measured include spectrographic methods. For details, see the Cleaning Validation page in the Support section at alconox.com.
